

Setting the PACE in 2016

Energize NY™ helps break down the barriers to energy saving solutions for building owners in NY State. Sometimes a lack of knowledge about energy saving solutions is the barrier, other times it may be access to qualified contractors or affordable financing. Energize NY drives demand for clean energy upgrades through community-based outreach about energy saving opportunities and by providing low-cost, long-term financing for projects. We work with our member communities throughout NY State to help building owners eliminate energy wasted in their buildings--saving money, fuel and greenhouse gas emissions.

Energize NY offers a number of clean energy services in its member communities: Energize NY Commercial, Energize NY Finance, Energize NY Residential and Solarize Westchester, which are designed to make energy savings decisions easier for building owners and to build large-scale demand for energy improvements.
